Maputo, Moçambique

**GOOD PEOPLE
GREAT COFFEE**

CAFÉ SOL

Since 2007, we have dedicated ourselves to promote African coffee, especially coffee from the Southern Africa region. Our mission is to support African farmers by buying coffee from farmer-owned cooperatives at a fair price and, at the same time, provide the best coffee to the consumer.

PRODUCTION AND FAIR PURCHASING

We buy green coffee beans directly from farmers in our region of Southern Africa via farmer-owned cooperatives. We believe deeply in supporting the African farmer; as such, we follow fair trade practices, offering to buy at a higher price, the extra margin ensuring that farmers also receive more, very needed, income and technical assistance from their cooperative's agriculture agents.

ROASTING

We roast our green beans in small batches, a maximum of 11 Kg at a time, in our infra-red coffee roaster. Before we package the coffee, we taste each and every batch to ensure the highest quality possible and consistency from one batch to the next. We have the much higher capacity to roast and package quantities of roasted coffee than what we currently produce. It all depends on the needs of our clients.

SALES

Our coffee is currently sold in all of Mozambique and, also, exported to Eswatini. Our company is keenly interested in expanding our sales to other countries. We believe that the flavor and quality of our coffees will be highly appreciated by coffee lovers all over the world.

We have developed many coffees roast profiles. Our main roasts that we currently sell in retail outlets are the following:

Full City (Light roast)
Espresso (Medium roast)
Ebony (Medium-dark roast)
Dragon (Dark roast)
